

The Platinum Curve Stairlift

Why Choose Platinum

In selecting Platinum Stairlifts you have chosen a company that has many years experience in designing and manufacturing stairlifts for curved staircases with an international reputation for high quality and exceptional service.

At Platinum we care about your needs and believe that our products and services can make a real difference in making life easier for you to enjoy more independence at home. Take time to familiarise yourself with the Platinum Curve and find out why Platinum is so often the first choice for curved stairlifts.

Making your house adjust to you

Climbing steep stairs, for example, can be strenuous and at times quite demanding physically. A stairlift can provide a simple, easy and convenient method of getting up and down stairs quickly and safely.

The Platinum Curve has been specifically designed to be very versatile and capable of fitting snugly and unobtrusively to almost any staircase. In most cases they are fitted to the stair-treads rather than the wall, so there is no building mess or damage to your décor.

If your staircase requires a lift which needs to negotiate landings and corners, you can be assured that the Platinum Curve was designed and built with you and your home in mind.

The Platinum Curve
